INTERNSHIP

YaaRaa Technologies

July 2025- Present

I worked on both front-end and involved in designing and building user interfaces, ensuring smooth communication between different parts of a web application. Developing responsive and user-friendly interfaces. Collaborating with a team to solve problems and enhance software performance. This internship helped you gain hands-on experience in full-stack development, improving your coding skills and understanding of modern web technologies.

PROJECTS

Landing Page For the Startup Site

Performed quality assurance and quality control activities at **QC Company, Kuwait**, including inspection, reporting, and process adherence to internal and industry quality standards while supporting continuous improvement efforts..

Bhummi

Built a farmer-centric web application that reduces dependency on middlemen by enabling direct access to markets and services. Integrated AI-based plant disease detection, real-time price monitoring, and curated agricultural video resources. Provided awareness of government schemes to improve farmer decision-making and profitability.
